About Me

Passionate and self-driven **Front-end Developer** with experience in building modern, responsive web applications using **React.js, Next.js, TailwindCSS, and TypeScript**. Focused on writing clean, maintainable code and creating smooth user experiences with modern UI practices.

Worked on real-world projects from scratch to deployment, including corporate websites and online platforms, with attention to **SEO, performance, and scalability**.

Always eager to learn new technologies and grow professionally. Open to both on-site and remote opportunities.

SKILLS

Languages & Frameworks : JavaScript, React, Next Js, Three js

Styling : TailwindCSS, SCSS/SASS, Responsive Design

Tools : Git, Github/Gitlab , figma (basic), zustand

Other : REST APIs, SEO, Clean Code, PWA

EXPERIENCE

Nobito — Online Medical Appointment Platform

Stack: Next.js, TypeScript, TailwindCSS, Zustand, Git

Live: nobito-demo.vercel.app

Developed the frontend of **Nobito**, an online appointment scheduling platform in the medical field. The project focuses on delivering a fast, responsive, and user-friendly interface across all devices.

Key contributions include:

- Built a **modern and professional UI** with attractive sections and sliders.
- Emphasized **clean code architecture** to improve performance and maintainability.
- Implemented **lightweight state management** with Zustand.
- Optimized for **fast loading times** and smooth user experience.
- Developed over **20 pages**, including homepage, doctor categories, doctor profiles, user dashboard, articles, and more.
- Added **Progressive Web App (PWA) support**, enabling app-like features such as installation and offline usage.

FD Arya — Corporate Website for Manufacturing Company

Stack: Next.js, TailwindCSS, Sass

Live: fdarya.com | <https://arya-vercel-demo.vercel.app/>

Designed and developed a full-featured, SEO-optimized corporate website for *Faravardeh Arya* company. The project showcases company information, product listings, and team members.

- Built the project entirely from scratch and handled both frontend logic and deployment.
- Applied modern UI design practices with full responsiveness.
- Focused on SEO, performance, and clean code architecture.
- Developed and launched within a 3-month timeline.
- Added **Progressive Web App (PWA) support**, enabling app-like features such as installation and offline usage.

Personal Portfolio Website

Stack: Next.js, TailwindCSS, Sass, Three.js, TypeScript

Live: mahanzandi.ir | [GitHub Repo](#)

A personal website designed to showcase my portfolio and professional background. The project features:

- Light and dark themes
- Responsive and modern UI/UX design
- Multilingual support using `next-intl` (Persian & English)
- A 3D section built with Three.js
- SEO best practices for improved visibility

Languages

- Persian – Native
- English – Intermediate
